# FALL/WINTER 2022 SUSTAINABILITY STATUS

**WE ARE WORKING** towards a fully circular collection, but what does that mean more specifically? In this case, we are talking about the number of styles in our collection that are circular by design. Most fabrics with natural fibers like wool or Tencel are circular in themselves but only if they are not blended with synthetics. A synthetic fabric is circular if it is made from both recycled and recyclable materials. Only recycled

or recyclable is a big step forward, but fully circular is the real game changer. A circular system means that we do not extract any resources from nature, lower all emissions and eliminate the concept of waste. Combined with long lasting quality and multifunctional garments, we can significantly reduce the overall impact of textiles.
