

SPRING / SUMMER 2019

Sustainability Status

SPRING / SUMMER 2019 SUSTAINABILITY STATUS

100% BROKEN DOWN 100% of our collection is either recycled, recyclable, renewable, biodegradable or Bluesign®-certified. Often a combination of several. This is a fantastic figure that required many years of hard work to reach. In the ambition to be completely transparent, we also want to break down that number. The numbers are not entirely easy to read so here are a few things to keep in mind: Our goal is to have 100%

circular products by 2022. However, 100% is not the goal of all these charts. We make products both in synthetics and natural fibers, and the graph for biodegradable and renewable is only applicable to natural fibers. In fact, all of our products in natural fibers are completely circular, but they only consist of 19% of the collection. Many products have several of these attributes, for example recycled, recyclable and circular.
